## Paper submission guidelines

Papers should be prepared in accordance with the following requirements:

1. Full length of the paper is not more than 3 pages (A4 format), including tables, illustrations and references;
2. The text of the paper should be carefully edited;
3. The figures in .gif, .tif and .jpg formats with a resolution of 300 dpi, and tables in MS-Word should be black-and-white (shades of gray). The exceptions are photographs of thin sections, geological and other maps which can be colored. The minimum font in the figures is 10 pt. We encourage to use illustrations only if they are directly related to the text and contribute to its more concise form. Figure captions must be included in the text. For equations and formulas, we recommend to use the built-in formula editor;
4. The abstracts of the papers are limited to 700 characters;
5. Materials submitted to the conference must be original contributions, not containing material previously published or accepted for publication elsewhere; same-type contributions from the same group of authors will be declined;
6. The papers must be furnished with expert evaluation;
7. Full papers (.docx) and expert evaluation reports (\* .pdf) should be submitted electronically to the organizing committee via the conference website. When submitting abstracts, please, indicate the research area and the contact-author's surname in the file name, for example, 6\_PetrovAA.docx;

The decision to include the presentation in the conference program will be made by the organizing committee upon acceptance of the paper for publication, of which each participant will be acknowledged additionally.

The conference program allows for both oral and poster presentations. Duration of the oral presentation is 15-20 minutes, including answers to questions and discussion. A computer and a multimedia projector are provided for demonstration of the presentations at the conference. Online participation with a presentation is also possible. The options for placement of a poster presentation (which should be a clear visual presentation of the submitted abstract) are: 1) in the conference hall (in A0 format, portrait orientation); 2) on the conference website, in electronic version (\* .pdf).
